

Cable Management

Cable Trays

Cable trays are design to be fitted to the side braces of 19 inch cabinets and are intended to provide "routing" for cables fitted inside the cabinet. Although primarily used for vertical cable runs the trays can also be cut and used horizontally within a cabinet. Each tray has a universal matrix of cut-outs to allow it to be fixed to the cabinet sides. Each tray is manufactured from 1,2mm steel and is painted in Dove Grey powder paint.

Cable trays are manufactured in a range of heights to suit available cabinets.

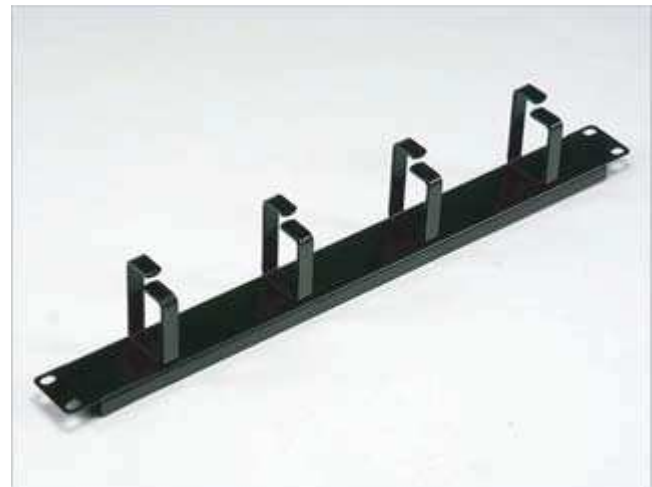

Ordering Information:

Size	150mm wide	300mm wide
