

# Server Cabinets

A range of 19 inch server cabinets especially configured to install network servers.

Supplied ready assembled, on castors and with removable doors and side panels to ease installation. The server range of cabinets has extended depth to allow the fitment of server mounting slides and has additional ventilation for cooling of the equipment.

There are also full range of accessories and cable management components to allow smooth cable paths and shelves to support monitors, keyboards and KVM components within the enclosure.
